PROJECTS

Employee Management System. (2020 - 2021)
- The Employee Management System (EMS) provides a complete information system for your employees. It can be used as a "stand alone" employee tracking system or it can be integrated with other P&NP software such as Payroll. Unlike "off the shelf" human resource software that requires extensive setup time for nursing home use, EMS was specifically designed for nursing homes.

To-do List App (2022 - 2023)
- To-do list app powered by Ethereum smart contracts. By making this application you can learn how exactly blockchain works or how blockchain applications work in general. In a simple to-do list web application.

File Transfer Apllication
- This application is a user-friendly, lightweight file transfer tool built using the Python programming language and the Tkinter graphical user interface library. This intuitive application allows users to seamlessly send and receive files between connected devices within the same local network.
